

5 important factors to consider before you select your water treatment system:

PRICE

PERFORMANCE

Nobody beats Safeway Water® for price and performance! We offer **top-of-the-line equipment** and **highly affordable prices!**

Safeway Water®

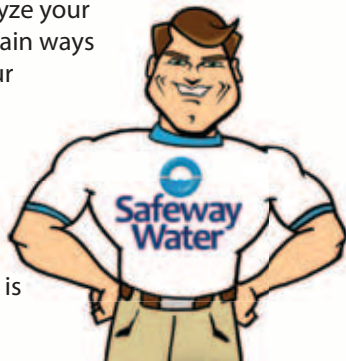

HIGHLY EFFECTIVE DESIGNS

Iron Zappers systems work when others fail because our design has a proven track record!

SAFEWAY WATER DEALERS

Our dealers are water treatment professionals, who are trained to analyze your water and explain ways to improve your water quality.

If you are concerned about your water quality, Safeway Water is for you!

Safeway Water systems offer **HIGH PERFORMANCE** and come with **HIGHLY AFFORDABLE PRICES!**

For more information please contact the Safeway Water dealer listed below. Our dealers are trained water treatment professionals, who can provide economical ways to improve your water quality.

IRON ZAPPER®

WARRANTY

We offer the **best warranty in the business**, including, lifetime on mineral tanks, seven years on control valves and five years on brine tanks. (See warranty card for more details.)

Curious about your water quality?

Give us a call, we will **test your water for free**

WATER TREATMENT SYSTEMS

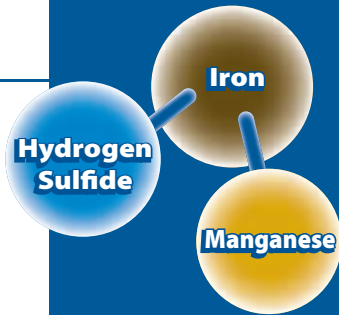

Your best buy

considering price & performance!

Iron Zapper® systems from Safeway Water® come with our highly effective Iron Zapper media, NSF certified pressure vessel, Safeway Water control valve, programed for air induction to accelerate the oxidation process and the best warranty in the business!

MODEL	TANK
050-1850	8x44
100-1850	9x48
150-1850	10x54

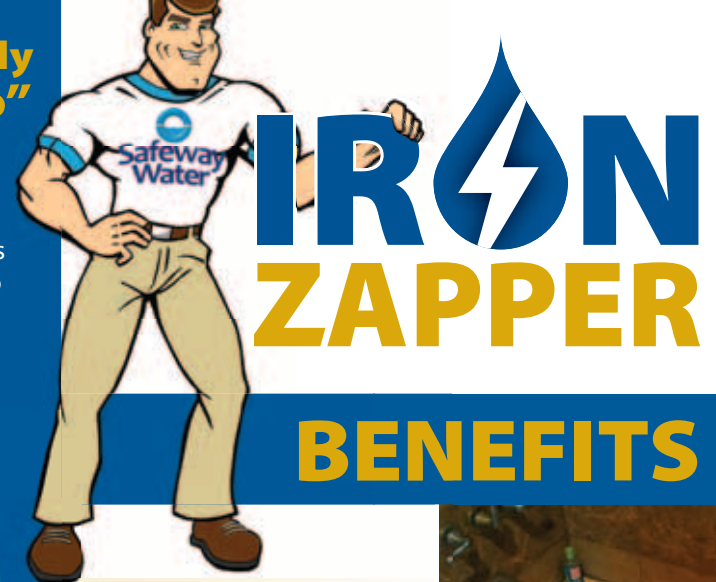

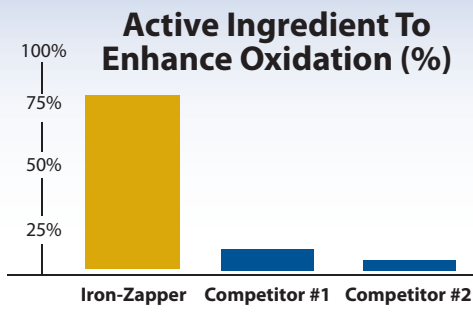

Iron Zapper® systems effectively treat the "troublesome trio"

Iron, Hydrogen Sulfide and Manganese are referred to in the water treatment industry as the "troublesome trio". This is because they are difficult to remove from water. Iron Zapper systems effectively treat the "troublesome trio".
Here's how!

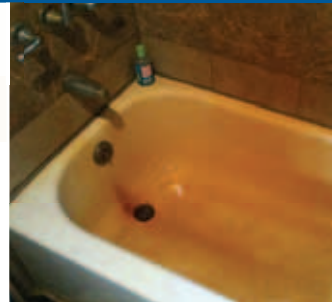

How Iron Zapper systems work

The Safeway Water electronic control valve is programmed to introduce air to the filter's tank for increased oxidation. Next, the Iron Zapper filter media acts as a catalyst to promote the oxidation process so Iron, Hydrogen Sulfide and Manganese become more filterable. Finally, the oxidized particles are removed from the filter during the backwash cycle.

BENEFITS

No Iron Stains

No black spots from Manganese!

A chemical free process!

- No chlorine (for oxidation)
- No Potassium Permanganate
- No chemical pump*

*Provided Chlorine or Hydrogen Peroxide are not required for disinfection or needed to enhance performance at higher concentrations.

The Iron Zapper filter media acts a catalyst to provide greater oxidation because our media has more active ingredient.

SPECIFICATIONS:

Iron reduction (to)	15 ppm
Hydrogen Sulfide	8 ppm
Manganese	3 ppm
Flow rate (cu. ft.)	6 GPM
pH range	6 - 9
Pressure drop (@ 10 GPM)	1.5 psi
